## RoHS COMPLIANCE STATEMENT

Due to worldwide environmental concerns, the need for lead-free devices in electronic components and systems continues to receive significant attention within the semiconductor and electronics industries. Display Logic USA, Inc. (DLU) is committed to working with our customers to offer products which meet their specific needs in this area.

DLU relies on information from third parties, including suppliers, and has not conducted destructive testing or chemical analysis on incoming materials and chemicals. Suppliers of materials used in the manufacture of DLU products, as well as manufacturers of DLU products, must provide written evidence of compliance to RoHS.

Compliant DLU products can be recognized by a Declaration of Conformity that will ship with the product. This declaration will certify that the product is in compliance with the current EU RoHS Directives 2002/95/EC to 2011/65/EU.
